

The externally extruded EVOH oxygen barrier reduces oxygen molecule permeation into the water. Compliant with standard DIN4756 (< 0.1 grams/m²/day).

Freight Policy

Freight charges are prepaid on orders of \$1500 net or more, except for LegendFlex 20' sticks for which orders of \$3500 net or more are prepaid. Can be combined with other Legend products.

LEGEND Flex®

Highly Flexible PEX heating tube with oxygen barrier, new lengths available immediately.

Manufactured from a proprietary polymer formulation which dramatically increases flexibility and maintains high strength. Available in 3/8", 1/2", 5/8", 3/4" and 1" tube sizes. LegendFlex delivers greater performance and flexibility than standard PEX. Meets the requirements of ASTM F 876 and F 877. We are so confident in its performance we back it with a 30 year warranty.

LegendFlex is extremely flexible and very difficult to kink. In the unlikely event one should occur, simply repair it with a heat gun. No need to cut and use a coupling or replace the tubing.

LegendFlex tubing is also compatible with cold expansion type fitting systems (compliant with standards ASTM F 2080 & ASTM F 1960). Its strength, durability and thermal memory enables proper seal with crimp or expansion style connections.

Residential, commercial and industrial applications include:

- Radiant heating and cooling
- Snow & ice melt
- GeoThermal
- Turf conditioning
