## NO LEAD LARGE DIAMETER DIELECTRIC UNION

### T-571NL (2-1/2" - 4")

High-strength, galvanized cast iron construction make them ideal for commercial and industrial applications.

Designed to reduce stray current and galvanic corrosion where two dissimilar metals are joined.

Self-aligning, non-conductive elastomer gasket and thermoplastic insert create a positive seal and complete isolation between the tubing and piping ends.

Optional high-temperature gaskets and inserts are available for steam and hydronic heating applications.

Available in sizes 2-1/2" to 4"\* in the FIP x sweat configuration

\*Note: Sizes 1/2" to 2" are of forged steel body construction. See (T-571 1/2" to 2") submittal sheet for details.

#### Working Pressure, Non Shock (PSI)

Cold working pressure (CWP): 200 psi up to 180° F

Saturated Steam (WSP): 30 psi up to 275° F / 300 °F (Intermittent)\*\*

\*\*When equipped with the optional high-temperature steam gasket and insert.
